

# ONE YEAR'S BIG BUSINESS IS SEEMINGLY ASSURED

Commercial and Manufacturing Interests Greatly Encouraged by Crop Report Issued by the Government.

By Charles W. Storm

International News Service.  
NEW YORK, Oct. 12.—Commercial and manufacturing interests received assurances from the government last week of at least one year of big business. These assurances were given in the shape of the report, which promises record commodity production.  
Whatever doubt there was concerning the value of the crops was removed by the publication of the report. It is estimated that the leading crops being raised this year will be sold at an advance of a billion and a half dollars compared with the total money received last year. Such an increase in the purchasing power of the farmers cannot help but be reflected by larger purchases by the farmers of the soil. Larger buying by the farmers will give additional business to the industrial corporations and railroads.  
It was, therefore, only natural that the stocks of industrial and railroad corporations should in many instances begin to count the greater earnings expected this year. Several issues touched new records for this movement.

**Steel Business.**  
While all industries are showing improvement it would be making a mistake to say that the steel companies are probably the greatest in their history. This was only reflected by the unfilled tonnage amount issued last week by the United States Steel corporation. Orders on the part of the corporation at the end of September were the greatest on record since the exception of June, 1907, when orders received from subsidiaries were also counted.  
One large independent steel company advanced the prices of plates and structural beams \$1 a ton and this increase is expected to be followed by the other large concerns.  
Announcement that the supply of copper metal in the United States on October 1 was 16,000,000 pounds greater than on September 1 rates constructed by copper producers as favorable as the price of the metal will tend to keep the price of the metal below 18 cents. The Anaconda Copper Company expected to increase its dividend in view of the large profits being received on copper sold at present prices and the greater income it is receiving from the Anaconda Copper company.
